

PREMIUM SOFTWOOD PLAY CHIP

BURY HILL
LANDSCAPE SUPPLIES

A blend of sustainable selected British Softwoods, our 100% natural 5-35mm Premium Softwood Play Chip is chipped to a uniformed size and offers a great balance between appearance, durability and economy, when compared to our hardwood chip, play barks and other decorative barks and coverings.

Fully tested for play use to BS EN 1177:2008, our Softwood Play Chip provides an attractive, clean and hardwearing surface, making it a great alternative to our more expensive play coverings and a good economical decorative solution for a wide range of landscape and garden uses. A light creamy beige colour which ages over time to a golden tan, our 100% softwood play chip is a clean chipped product with minimal fines providing good drainage, which in turn helps to prolong the products longevity and a better loose impact absorption surface, making it a good choice for use in all play areas, and particularly large play areas where economy and safety are paramount.

PRODUCT BENEFITS

- Responsibly sourced from 100% natural & environmentally friendly sources
- 100% Organic
- Suitable for all play areas
- Very consistent product with uniformed finish
- Attractive light creamy beige colour
- Free from pathogens, pests and weed seed
- Hostile living environment for pests
- Clean & free draining
